All Fit frames are designed for 1 1/8" integrated style headsets (Campagnolo compatible 45°/45° with 41.8mm O.D. cups), press fit Mid bottom brackets, and 14mm rear axles. All dimensions and geometry are based around a FIT frame using a FIT fork.

The EDDIE frame is available in S, M, L, and XL sizes instead of the standard top tube lengths because the laid back seat tube effectively lengthens the top tube without changing the feel of the bike. These sizes correspond to the traditional 20", 20.5", 20.75", and 21" TT lengths respectively, even though the top tubes actually measure slightly longer.
